PROJECTS

- **Portfolio.cbeebe.net –** Serverless Portfolio of projects built with JavaScript. Uses React, Babel for primary structure of portfolio. Uses Chai, Mocha, Jest and Enzyme for testing. Portfolio is then bundled with webpack and uploaded to AWS via a python a boto3 lambda script. Portfolio is tracked on AWS with Code Build and Code Pipeline (Python, JavaScript, React.js, Babel, *AWS: Route56, CloudFront, Lambda, Codebuild)*
- **Book Review Web App -** Book review web application. Uses flask micro service framework connected to a Heroku/Postgres database via SQLAlchemy. Allows user to create a login, authenticate login information, search for books, leave reviews on books, and sends a http requests to Goodreads.com to show review information and count (Python, HTML5, CSS, Bootstrap, Flask, SQL)
- **Password Generator App -** Android app that allows the user to select the length of the password they want generated with a seek bar. User can then click the generate button to generate a random password of desired length. Password meets most password policy requirements (Java, Android, XML)
